**Randi continues her search for a living kidney donor...
Please consider a Gift of Life.**

Dear Friends,

Some of you may know that I have kidney disease. Over time, my kidney disease has gotten worse, causing my kidneys not to work well enough to keep me alive. My treatment options at this time are limited to dialysis or a kidney transplant. I have been on dialysis for some time now, 3 days a week for 4 hours each day, which is helping my kidneys do their job of removing wastes, toxins, and extra fluids. But the longer you are on dialysis the more your health deteriorates.

However, a living donor kidney transplant would offer me much more freedom and the ability to live a longer, healthier, and more meaningful life. A transplant would also give me more time to do the things I love most, such as spending time with my family and friends, my partner Nick, my pets, helping others, and being outdoors.

Finding a kidney is not easy. People who are on a wait list for a kidney from a deceased donor often have to wait 5-10 years and the kidney lasts on average lasts 15-20 years. But the average wait list for a living kidney donor is much shorter, sometimes even months, and the kidney typically lasts 20-30 years. It also has much better function.

In order to donate, living kidney donors get a careful and thorough evaluation with their own team of health professionals to see if you could be a match for me and to ensure that living donation is as safe as possible for you.

In order to express your interest in becoming my kidney donor, you can fill out the form at this link: mmc.donorscreen.org/register/now. Upon submission, the Maine Transplant Program will be in touch with you. To learn more about kidney donation, you can go to the National Kidney Foundation's website: www.kidney.org/livingdonation. There are other informative websites as well.

Thank you for taking the time to read my story. A major way you can help me is to share it with your friends and family. A second option is to share it on social media.

With much appreciation,
Randi Gelfman

Pet Needs!

PET TIP!

This time of year, mushrooms start popping up on forest floors and around your yard. While most of these fungi are safe to eat, others are highly toxic to your pet – and it's best not to take the risk. Prevent your dog from ingesting them by supervising independent play and keeping him close during off-leash walks and hikes
